

R2G™ Ready-To-Go Batteries

R2G™
R E A D Y T O G O

Lenmar's R2G batteries combine the long stay-charged life of alkaline batteries with the 1000 recharges of nickel-metal hydride (NiMH) cells. In fact, R2G's hold their charge up to 4 times longer than conventional NiMH technology, meaning there's a charged battery on hand just about any time it's needed. We also provide a full complement of fast, versatile chargers.
